

Hi, we live process automation and love to share it!

JIT - Masterminds in Process Mining, Process Automation, and RPA

We design automation that is exciting to both people and machines. We achieve this by combining your profession and our long-lasting training and development experience.

- Value added reseller
- Short time to market
- Sustainable knowledge transfer
- Agile integration

Core Services

- Customized Workshops:
 - BPMN 2.0 process modelling
 - Process automation
 - Process Mining
 - Robotic Process Automation
- Proof of Value & Pilot project execution
- Consultations
- Development of custom connectors
- Tailored license models

Certified Partners:

Advantages

- Everything from a single source
- Quick integration of your systems
- Big picture of your processes
- Cost reduction & efficiency improvement
- Create of sustainable values
- Knowledge conservation

ANALYST
Understanding

Gather digital footprints, visualize processes, recognize correlations

DATA ENGINEER
Connect

Integrate source systems, transform processes into event logs, create real-time connections

BUSINESS USER
Optimize

Automate, eliminate shortcomings, implement optimizations

EXECUTIVES AND MANAGER
Monitoring

Visualize real time KPI's, ongoing leverage benchmarking, assure process conformity

Success Stories

Magenta® .. T-Mobile

Replacement

Customer Service
Customer Service reduced development costs by 30%

300+
active processes in production

A1

Efficiency

Create Clarity
Readable processes for people and machines

3 days
Proof of concept

Time to market

Easy Integration
Quick pilot project realization

3 weeks
duration of implementation

An excerpt of our Tools:

Camunda BPM workflow engine, Celonis Process Mining, IBM Process Automation by Automation Anywhere, Java, Java EE, Java Spring, Java JSF, JPA/Hibernate, GWT, Angular, React JS, NodeJS, Java Script Frameworks (sonstige), React Native (Cross-platform mobile development), Git, JUnit, Mockito, BPMN 2.0, JBoss, Apache Tomcat, Wildfly, Spring Boot, SQL, PL/SQL noSQL, PostgreSQL, Oracle

To our successful, satisfied customers include:
